Email Address: wafulamoses35@gmail.com
Nairobi, Kenya

PROFESSIONAL SUMMARY

Graduate in Electrical and Telecommunication Engineering with practical knowledge in industrial operations, electrical systems, automation, and instrumentation. I have experience in troubleshooting electrical equipment, supporting maintenance activities, and developing automation projects using Arduino and industrial control concepts. Skilled in AutoCAD electrical drafting, PLC basics, power distribution, and technical writing. Passionate about Industrial energy systems, process optimization, and new technologies in manufacturing and energy sectors.

SKILLS AND COMPETENCIES

- Industrial automation and control systems
- Preventive and corrective maintenance
- Fault diagnosis and repair
- Electrical distribution systems
- Electrical wiring and connections
- Engineering drawing interpretation
- Root cause analysis
- Embedded systems fundamentals
- PLC fundamentals
- Proficient in AutoCAD, Proteus, KiCAD, and CODESYS

PROFESSIONAL EXPERIENCE

Maintenance Intern —Burn Manufacturing Company, Kiambu, Kenya

FEB 2026 — Present

- Assisted in preventive and corrective maintenance of industrial production machines to minimize downtime.
- Participated in troubleshooting electrical and mechanical faults in CNC laser cutting and press machines.
- Supported installation and commissioning activities for CNC welding machines.
- Assisted technicians in inspecting electrical connections, control panels, and machine components.
- Contributed to maintaining safe operational standards during maintenance activities.

- Supported daily production operations by responding to machine breakdowns and maintenance requests.
- Gained exposure to industrial automation systems and manufacturing processes.
- Participated in LPG stove leak testing and inspection using pressure decay equipment.

Electrical and Instrumentation Intern —National Cement Company Ltd, Athi River, Kenya

July 2023 — Sep 2024

- Assisted in preventive and corrective maintenance of industrial electrical equipment and plant machinery.
- Participated in troubleshooting electrical faults in motors, control panels, and power distribution systems.
- Supported inspection and maintenance of electrical installations to ensure safe plant operation.
- Assisted in monitoring plant equipment performance and reporting faults for corrective action.
- Gained practical exposure to motor control systems, protection devices, and industrial automation processes.
- Supported maintenance of conveyor systems and other electrically driven production equipment.
- Participated in routine plant inspections and adherence to electrical safety procedures.
- Worked with maintenance teams during shutdown maintenance and system servicing activities.
- Gained exposure to industrial instrumentation and process control systems used in cement production.
 - Assisted in reading and interpreting electrical drawings and system layouts.

EDUCATION

Bachelor of Science in Electrical and Telecommunication Engineering

- Multimedia University of Kenya — Nairobi, Kenya | 2019 —2025

PROJECTS

AUTOMATIC PHASE SELECTOR SYSTEM

- Designed and implemented an automatic phase selector using Arduino and relay switching.
- Simulated and tested using Proteus.
- Integrated LCD voltage monitoring and automatic load transfer functionality
- Improved understanding of power reliability and electrical protection systems.
